"(1) Nominal voltage/frequency range can be extended beyond nominal if required by the utility.

(2) Limits may vary. Refer to local requirements to define the number of microinverters per branch in your area.

(3) Inverter may enter low power mode in environments with poor ventilation or limited heat dissipation

(4) Recommend no more than 80 inverters register to one ECU for stable communication. "

Meets the standard requirements for Distributed Energy Resources (UL-1741) and identified with the CSA Listed Mark
